City of yakima Council members:

I am a stroke survivor for the last 14 years. Four years ago I injured my back and ten months ago it turned into extreme pain and it took 10 mths to diagnose the problem. I haven't been able to sit in my bathtub for 14 yrs but was able to stand and shower. The last 10 mths I haven't been able to do either, so I told my Dr and he brought in a rep from special services, they got right on it and within 3 weeks I had a walk in shower installed that I could get my legs into easily. I thank you ^{for} the grant that made this possible and the installer Travis from Community Development Services, who did an excellant job for being patient with an 80 year old crippled lady. Thank you all for your support of this program!

Sincerely
Rose M. Gillett
