SHORELANDS FLOODPLAINS BY DESIGN AGREEMENT

BETWEEN

THE STATE OF WASHINGTON DEPARTMENT OF ECOLOGY

AND

YAKIMA COUNTY

This is a binding Agreement entered into by and between the state of Washington, Department of Ecology, hereinafter referred to as "ECOLOGY," and Yakima County, hereinafter referred to as the "RECIPIENT," to carry out with the provided funds activities described herein.

GENERAL INFORMATION

Project Title:	Naches-Cowiche Setback Levee Construction and Riparian Planting
Total Cost:	\$516,000.00
Total Eligible Cost:	\$516,000.00
Ecology Share:	\$516,000.00
Recipient Share:	\$0.00
The Effective Date of this Agreement is:	07/01/2019
The Expiration Date of this Agreement is no later than:	06/30/2023
Project Type:	Floodplains by Design

Project Short Description:

The RECIPIENT will construct a setback levee on the right bank of Cowiche Creek between U.S. Highway 12 and Powerhouse Road to reconnect approximately 3 acres of historic floodplain and reduce flood risk to the City of Yakima. The RECIPIENT will also develop and implement a riparian vegetation maintenance plan for the confluence of the Naches River and Cowiche Creek to restore degraded riparian and floodplain functions.

Project Long Description:

Moderate flood events on Cowiche Creek in 2016 and 2017 led to the rapid progressive failure of the levee on the right bank of Cowiche Creek just upstream of U.S. Highway 12 on the northwest edge of the City of Yakima, Washington. Constrained by the highway embankment and other anthropogenic developments, the floodwaters were unable to return to the creek or the Naches River and caused extensive damages far into the city. The events highlighted the existing vulnerabilities and the pressing need for coordinated flood risk reduction actions across the

Naches-Cowiche confluence. Building on the recommendations of the 2018 Cowiche Addendum to the Upper Yakima Comprehensive Flood Hazard Management Plan, the RECIPIENT developed the Naches-Cowiche Flood Risk Reduction and Floodplain Restoration Project (Project) to coordinate the design and implementation of a series of interrelated flood hazard reduction actions and floodplain restoration efforts across the confluence.

The Project has three phases:

Phase 1. Preliminary design and land acquisition.

Phase 2. Final design and permitting.

Phase 3. Construction, revegetation, and re-mapping of the regulatory floodplain.

Phase 1 and a portion of Phase 2 of the Project are funded by a grant from the Yakima Basin Integrated Plan (YBIP). Building on the YBIP efforts, this Floodplains by Design (FbD) grant provides funding for part of Phase 3, the construction of a setback levee on the right side of Cowiche Creek between Highway 12 and Powerhouse Road. The new levee will significantly reduce the flood risk to over 16,000 residents in the City of Yakima.

This FbD grant also funds the development and implementation of a riparian vegetation maintenance plan. The planting effort will accelerate the ecological recovery of the floodplain after the construction of the setback levee.

Overall Goal:

The goal for this FbD grant is the successful construction of a flood risk reduction levee between Highway 12 and Powerhouse Road, and the implementation of riparian maintenance and planting efforts at the Naches-Cowiche confluence. This FbD grant is a substantial step towards the eventual realization of the objectives for the overarching Naches-Cowiche Project effort:

1. To reduce the flood risk to the City of Yakima, U.S. Highway 12, Powerhouse Road, and adjacent working agricultural lands.
2. To reduce the need for costly and disruptive emergency maintenance and response efforts (e.g. road closures, flood-fights to prevent berm overtopping, channel dredging, etc.).
3. To restore fish passage, ecological floodplain functions, and habitats for native and endangered species on Lower Cowiche Creek and within the Naches floodplain and confluence.

SCOPE OF WORK

Task Number: 1 **Task Cost: \$18,000.00**

Task Title: Project Administration/Management

Task Description:

A. The Recipient will administer the project. Responsibilities will include, but not be limited to: maintenance of project records; submittal of requests for reimbursement and corresponding backup documentation; progress reports and recipient closeout report (including photos); compliance with applicable procurement, contracting, and inter-local agreement requirements; application of, receipt of, and compliance with all required permits, licenses, easements, or property rights necessary for the project; and submittal of required performance items.

Every effort will be made to maintain effective communication with the Recipient's designee; the department; all affected local, state, or federal jurisdictions; and any interested individuals or groups. The recipient must carry out this project in accordance with any completion dates outlined in this agreement. Budget deviations are allowed between budget objects, e.g., the RECIPIENT may spend less money on one task and more on another, but under no circumstances may the RECIPIENT exceed the total project cost. The approval of the ECOLOGY Project Manager is required for this deviation.

SCOPE OF WORK

Task Number: 2 **Task Cost: \$434,000.00**

Task Title: Setback Levee Construction

Task Description:

The RECIPIENT will hire a public works contractor through a competitive procurement process for the construction of a setback levee on the right bank of Cowiche Creek between Highway 12 and Powerhouse Road. This task includes construction costs, construction contract administration, surveying and inspection of the project, engineering services during construction, and preparation of the as-built plan set.

The existing levee is enrolled in the U.S. Army Corps of Engineers (Corps) Public Law 84-99 (PL 84-99) Rehabilitation Program. PL 84-99 provides authority to the Corps to repair and/or rehabilitate any qualified flood control project damaged by flood waters. The RECIPIENT will coordinate a post-construction inspection with the Corps to ensure the setback levee is eligible for continued coverage in the program.

Note: The levee will also be designed to meet the requirements for accreditation by the Federal Emergency Management Agency as a flood risk reduction system expected to provide base flood risk reduction within the context of the National Flood Insurance Program. The certification and accreditation process is contingent on the implementation of all project efforts across the Naches-Cowiche confluence and is beyond the scope of this agreement.

Task Goal Statement:

Construction of a setback levee between Highway 12 and Powerhouse Road that keeps the levee in the Corps PL84-99 program.

Task Expected Outcome:

Hydraulically reconnect approximately 3 acres of the Cowiche Creek floodplain and improve flood protections for the City of Yakima.

SCOPE OF WORK

Task Number: 3 **Task Cost: \$64,000.00**

Task Title: Floodplain Restoration Planting & Maintenance

Task Description:

Building on two property-specific preliminary riparian vegetation management plans previously completed by the North Yakima Conservation District, the RECIPIENT will develop a site-wide interim riparian vegetation maintenance plan for the Naches-Cowiche confluence. The plan will set priorities and guide the vegetation management activities within the grant period. The plan will use a combination of riparian best management practices (weed removal, mowing, herbicide application, etc.) to support existing native plant vitality and to discourage the establishment of noxious or invasive weeds.

The RECIPIENT will implement the maintenance plan over the duration of the project period. The RECIPIENT will prepare an annual maintenance action summary report describing annual maintenance actions performed and documenting before and after conditions.

The RECIPIENT will also implement a strategic riparian planting effort to accompany the construction of the setback levee on the right side of Cowiche Creek between Highway 12 and Powerhouse Road. The planting effort will include a combination of native grasses, willow pole cuttings, and beneficial native riparian trees and shrubs installed to accelerate the restoration of the floodplain functions on Cowiche Creek.

After planting is complete, the RECIPIENT will submit GIS shapefiles of the planting area(s) and associated waterbody to the ECOLOGY Project Manager and upload them to EAGL.

Task Goal Statement:

Riparian planning, planting, and maintenance to improve and accelerate the ecological restoration of the Naches-Cowiche confluence.

Task Expected Outcome:

Improve riparian habitats and restore floodplain functions to benefit native fish and wildlife in the Naches-Cowiche confluence.

ECOLOGY may terminate for cause this Agreement with a seven (7) calendar days prior written notification to the RECIPIENT, at the sole discretion of ECOLOGY, for failing to perform an Agreement requirement or for a material breach of any term or condition. If this Agreement is so terminated, the parties shall be liable only for performance rendered or costs incurred in accordance with the terms of this Agreement prior to the effective date of termination.

Failure to Commence Work. ECOLOGY reserves the right to terminate this Agreement if RECIPIENT fails to commence work on the project funded within four (4) months after the effective date of this Agreement, or by any date mutually agreed upon in writing for commencement of work, or the time period defined within the Scope of Work.

Non-Performance. The obligation of ECOLOGY to the RECIPIENT is contingent upon satisfactory performance by the RECIPIENT of all of its obligations under this Agreement. In the event the RECIPIENT unjustifiably fails, in the opinion of ECOLOGY, to perform any obligation required of it by this Agreement, ECOLOGY may refuse to pay any further funds, terminate in whole or in part this Agreement, and exercise any other rights under this Agreement.

Despite the above, the RECIPIENT shall not be relieved of any liability to ECOLOGY for damages sustained by ECOLOGY and the State of Washington because of any breach of this Agreement by the RECIPIENT. ECOLOGY may withhold payments for the purpose of setoff until such time as the exact amount of damages due ECOLOGY from the RECIPIENT is determined.

If this Agreement is so terminated, the parties shall be liable only for performance rendered or costs incurred in accordance with the terms of this Agreement prior to the effective date of termination.

Non-Allocation of Funds. ECOLOGY's ability to make payments is contingent on availability of funding. In the event funding from state, federal or other sources is withdrawn, reduced, or limited in any way after the effective date and prior to the completion or expiration date of this Agreement, ECOLOGY, at its sole discretion, may elect to terminate the Agreement, in whole or part, or renegotiate the Agreement, subject to new funding limitations or conditions. ECOLOGY may also elect to suspend performance of the Agreement until ECOLOGY determines the funding insufficiency is resolved. ECOLOGY may exercise any of these options with no notification or restrictions, although ECOLOGY will make a reasonable attempt to provide notice.

In the event of termination or suspension, ECOLOGY will reimburse eligible costs incurred by the RECIPIENT through the effective date of termination or suspension. Reimbursed costs must be agreed to by ECOLOGY and the RECIPIENT. In no event shall ECOLOGY's reimbursement exceed ECOLOGY's total responsibility under the agreement and any amendments. If payments have been discontinued by ECOLOGY due to unavailable funds, the RECIPIENT shall not be obligated to repay monies which had been paid to the RECIPIENT prior to such termination.

RECIPIENT's obligation to continue or complete the work described in this Agreement shall be contingent upon availability of funds by the RECIPIENT's governing body.
