Scope of Work

Spring Creek Road and 36th Avenue Improvements City of Yakima Environmental Services

PROJECT UNDERSTANDING

The City is currently undertaking the construction phase of the Spring Creek Road widening. The project will consist of widening roadway shoulder, improved pedestrian facility, signage and striping of the new roadway. The project is intended to provide improved access to the newly constructed Soccer Sports Complex.

The scope of this work provides for the construction support as well as the revised mitigation plan and As-built permit.

The following tasks are anticipated:

TASKS:

1.1 Revised Wetland Mitigation Use Plan

A wetland mitigation plan was prepared for the development of the City owned properties. The revised plan will be completed to meet the requirements of the United States Army Corps Engineers (Corp) and Department of Ecology (DOE). The following subtask will be undertaken in preparation for the revised project mitigation use plan.

1. Condition assessment of the proposed mitigation site.
2. Analysis of the proposed impacts and the proposed mitigation site to show how the mitigation site complies with the Corp and DOE regulations.
3. Complete a draft of the wetland mitigation use plan which will include a narrative describing the proposed mitigation site, a vicinity map, a plan view and/or detail maps of the proposed mitigation and other informational maps as required by the permitting agencies.
4. Revise the plan based on agency comments

Deliverables

- Draft revised mitigation use plan for review by the City with accompanying draft special provisions if required.
- Draft mitigation use plan, incorporating the City's comments, for submittal to the Corp and DOE.
- Revised draft mitigation plan, incorporating comments by the Corp and DOE.

1.2 Construction Support

Widener will assist the engineer by assisting with the planting and placement of habitat structures along Spring Creek. The planting plan will to be followed which include numbers, types and location of plants as well as habitat log and boulder locations.

1.3 As-Built Plan

An As-Built Report will be prepared and will verify that the *Wetland Mitigation Plan* was built as per the revised plan in the field. All discrepancies between the plan and what was built in the field will be documented in the report. The report will be submitted to the United States Army Corps of Engineers (USACE).

- Draft As-Built
- Final Report to be submitted to the USACE and the City incorporating City comments.
